One Need **One Solution**

Barcelona, Spain.

Timisoara, Romania.

Welcome to Inkema.

Inkema is a specialist in providing integrated solutions for loading and unloading processes and the management of access through industrial enclosures. Our highly qualified team, with over 25 years of experience within the sector, designs, produces, installs and provides after-sales services for our entire product range: loading bays, scissor tables, yard ramps, industrial doors and dock shelters, among others.

A high quality product and quick service are the most valued characteristics by our customers, therefore our aim is to satisfy their needs by offering a customized and quick service, that offers the most suitable solution in each specific case.

Inkema products are used in all areas, in small workshops and food or automotive industry, as well as in large logistic

centres. Each customer has his own needs and each solution has its own specific characteristics. As a manufacturer with its own **R+D+I Department**, **Inkema** is able to guarantee the production of precise, robust, and safe products that comply with all the European standards, and always from the perspective of satisfying our customers' needs, with extremely reasonable prices and products of proven quality that offer users an excellent performance and durability.

A key to our success is innovation, and developing new products is one of our main concerns. For this reason we invite you to visit **www.inkema.com** and discover all the products and services we provide in order to satisfy your needs: our solution. Welcome to **Inkema**.

Loading bridges

Minidock

Reduce the size without giving up other features.

Practical, easy to install, safe and saving a considerable amount of space. Since its launch, the **Inkema Minidock** has been a huge success. It is a fast, easy option for installing in any loading bay thanks to its size and the fact that it requires no installation pit.

Despite its small size, it can support up to 6.000 kg dynamic load in loading and unloading operations.

The **Minidock** is supplied with a special coating for corrosive atmospheres. Inkema **Minidock** is comprised of the following elements:

- **Platform** with an upper sheet of tear plate with a thickness of 6/8 mm and solid profiles.
- A **lip** made of tear plate with a thickness of 13/15 mm.
- A **fixed part** that acts as a handrail and is welded to the bay sub-frame in order to increase safety when loading and unloading goods.

Its inner mechanism allows the operator to open it with almost no effort. All that has to be done is inserting the lever into the opening of the moving part and pull it until the **Minidock** is completely vertical. Then push the lever until the lip is resting on the truck.

To remove the **Minidock** after loading/unloading, pull the lever backwards without raising it entirely and place it on the lowering stops.

- 1 Different **bumpers** are available, as an option, to be installed at the ends.
- 2 Its **tear plate surface** prevents from slipping.
- 3 The **lip** is folded at the end, to allow it to correctly fit on the truck and it is milled at its outer end to ease the passage of the fork trucks while loading and unloading goods.

* All the **Minidock** comply with EU standards.

Safety directives and standards

All the levellers and loading bridges have been calculated and designed pursuant to the following European directives and standards:

Directives:

2006 / 42 / EC
2004 / 108 / EC
2006 / 95 / EC

Machine safety.
Electromagnetic compatibility.
Low voltage.

European Standards:

EN 1398:2010
EN ISO 12100-1:2010
EN 61000-6-2:2006
EN 61000-6-4:2011
EN 60204-1:2010

Levelling ramps.
Machine safety. Basic concepts. General design principles.
Electromagnetic compatibility. Basic immunity concepts for industrial environments.
Electromagnetic compatibility. Basic emissions concepts in industrial environments.
Machine safety – Electrical equipment – General provisions.

Warranty and safety

As calm as on the first day.

Some firms manufacture their products without offering a full guarantee, in order to save costs. Unfortunately, some firms prefer to cut down on safety systems. Others prefer to make their products with poor-quality materials. **Inkema** is well aware

of this, and for this reason, we declare that our products are safe and that they are of the highest quality and completely guaranteed. In all cases with the aim to satisfy the needs of our customers and at the fairest price. But without affecting the safety and guaranteed quality of its products and systems.

Inkema Range

A wide range of products to meet all your needs.

Inkema is not just a specialist in levellers, ramps, loading bridges, free standing frames and dock houses. More than 25 years of experience in its sector have led Inkema to extend its product range, to fully satisfy all the needs of its customers, which are from more than 42 countries.

The **Inkema** range combines variety, innovation, functionality, quality, price and service. This is the result of the ceaseless efforts of its different departments. The range is comprised of: levellers, ramps, scissor tables, industrial doors, high-speed doors, dock shelters and fire doors. In addition, **Inkema** has a varied range of dimensions, finishes and accessories that can be adapted to suit the requirements of each customer.

Below there is a list of the different types in each product family of the **Inkema** range:

- **Scissor tables:** single scissor, double scissor, special scissor tables, etc.
- **Dock shelters:** retractable, fix, foam seal and inflatable.
- **Industrial doors:** industrial (normal and glazed) and residential doors.
- **High-speed doors:** folding, rolling, self-repairable and cold storage.
- **Fire doors:** vertical, sliding, rolling and pedestrian doors.
